

Environmental Impact Assessments Initial Advice Statements and EPBC Referrals

The success of our EIS approvals is a direct result of developing close working relationships with our clients and interacting regularly with stakeholder groups, Traditional Owners, the community and government agencies to plan for changes in social, economic and political project parameters and to formulate workable mitigation solutions to produce sustainable project outcomes.

Coordinated Project EIS and Environment Protection and Biodiversity Conservation (EPBC) Referral work recently undertaken by CQG includes:

- Great Keppel Island Revitalisation Plan (project management of a major tourism development project in the Great Barrier Reef Marine Park) (Approved by Local, State and Federal Government in 2013);
- Fitzroy Terminal Project (coal export facility in Central Queensland);
- Boulder Steel (proposed steel mill near Gladstone, EIS includes plant, haul road, rail spur and port facilities); and
- Wongai Project (proposed underground coking coal project in Cape York region, Traditional Owner led project).

CQG will guide you from project conception through to development of preliminary documentation, constraints mapping, liaison with government agencies and development of impact assessment scopes. We will select reputable specialists, evaluate quotes, review technical reports, prepare budgets and track financial commitments, complete project scheduling, conduct field surveys, prepare the impact assessment and liaise with agencies about the approval conditions.

Our team has hands-on experience in the project management and preparation of EIS and EPBC Referrals for projects in the following sectors:

- Transmission lines;
- Mining projects;
- Rail developments;
- Port developments;
- Smelters;
- Tourism particularly in World Heritage Areas;
- Major highway interchanges; and
- Business Parks.

CQG's experienced team will deliver a quality impact assessment report that meets the expectation and needs of the community, our clients and assessment agencies.

CQG Consulting (CQG) has extensive experience and an excellent track record in the preparation of Environmental Impact Statements (EIS) to a standard that facilitates timely assessment and approval by all levels of government.
