

Environmental Monitoring

CQG Consulting (CQG) is regional Queensland's leading environmental consultancy. CQG has experienced and certified environmental monitoring specialists available for environmental monitoring.

Our areas of environmental monitoring expertise include:

- Groundwater;
- Surface water;
- Marine;
- Soil;
- Sediment;
- Dust;
- Vegetation;
- Noise; and
- Contaminated land.

CQG can provide monitoring equipment, with all equipment being maintained and calibrated to relevant Australian standards.

CQG use NATA accredited laboratories for analysis.

CQG can assist with all stages of environmental monitoring, including:

- Preliminary investigations and recommendations;
- Monitoring requirements and analysis (short term and long term); and
- Review and reporting against relevant guidelines and limits.

CQG have experience in developing a tailored monitoring regime to meet your needs. We specialise in monitoring for the following:

- Energy generation;
- Industrial sites;
- Construction;
- Contaminated sites;
- Marine environments;
- Mining;
- Land rehabilitation;
- Ports; and
- Landfills.

Our Environmental Scientists have extensive environmental monitoring and reporting experience throughout Queensland.
