

Flora and Fauna

CQG Consulting has a team of ecologists experienced in undertaking:

- Flora and fauna surveys;
- Development of flora and fauna management plans;
- Habitat assessments;
- Fauna spotter / catcher services;
- Threatened species management;
- Pre-clearing surveys;
- Fauna trapping and translocation;
- Development of bushfire management plans;
- Weed surveys and management plans;
- Re-vegetation and rehabilitation plans;
- Marine megafauna surveys;
- Fisheries management;
- Ecosystem function analysis.

CQG's ecologists have a broad knowledge of flora and fauna interactions having undertaken a range projects from basic site walkovers, through to pre clearing surveys, vegetation assessments and mapping, threatened species management, rehabilitation activities and flora and fauna impact assessments.

Our ecologists have experience working within national parks, state forests, linear infrastructure projects including gas transmission pipelines and road construction, mine sites, civil construction sites, greenfield developments and privately owned properties. Our staff live and work in rural areas and are experienced working in remote locations.

**CQG Consulting is
a leading ecological firm in
Central Queensland.**
