

Natural Disaster Waste Management Services

CQG Consulting has a fully accredited team with hands on experience in emergency response planning and implementation of disaster recovery for waste management in urban and remote areas.

Proven ability to implement initiatives to prepare for and respond to natural disasters.

- Emergency Response Management Plans and checklists
- Site selection for temporary collection facilities
- Review existing waste contracts to ensure inclusion of relevant clauses for natural disaster and emergency response
- Source and organise quotes, equipment and services from reputable contractors
- Prepare tenders, arrange and assess quotes, manage and audit contractors to ensure value for money services
- Conduct surveys and inspections
- Coordinate waste management - setting up of and managing temporary facilities, waste transfer stations and landfills to maximise diversion rates
- Prepare signage, media releases and community information materials
- Identify appropriate management of asbestos and other hazardous materials and raise community awareness
- Waste tracking
- Drone data capture, aerial photography and production of maps
- Environmental monitoring - water, noise and dust
- Meet with regulatory agencies, reporting, provide regulatory advice and auditing
- Financial management, liaise with insurance assessors and political representatives
- Assist with day to day recovery operations
- Coordinate photographic recording, reporting and prepare funding applications

Let CQG help you reduce costs and stress prior to, during and after the event.
