

# Waste Management and Landfills

CQG Consulting (CQG) is able to provide our clients with 'whole of project' solutions for waste management. We have developed and implemented waste management plans for industrial facilities, commercial developments and local Councils.

CQG assisted with collation of industry comments on the National Waste Policy in 2009 and was engaged by Waste Management of Australia in 2010 to facilitate Queensland workshops and collate feedback on the Draft Waste Strategy Consultation Paper.

CQG is often engaged to conduct surface water, dust and groundwater monitoring at closed and operational landfill sites. Our team has audited numerous closed landfill sites throughout Queensland to identify and rank potential environmental risks.

## Examples of waste management and landfills services CQG is able to provide include:

- Tender development and assessment;
- Waste management strategies;
- Waste data management;
- Landfill audits;
- Leachate monitoring;
- Infrastructure assessment;
- Waste audits;
- Waste management plans;
- Monitoring programs;
- Training;
- Waste treatment and disposal advice; and
- Approvals.

**Our team members have prepared Waste Management Strategies for Councils throughout Queensland.**
