To Whom It May Concern,

Re: Reference for CQG

I am pleased to provide a positive reference for CQG.

Tower Holdings engaged CQG in 2008 to provide a range of specialist environmental advisory services in relation to the Great Keppel Island tourism resort project. The project has involved one of the most significant regulatory assessments since the inception of the Environmental Protection and Biodiversity Conservation (EPBC) Act 1999.

CQG has played a pivotal role in managing the environmental assessment process which has consisted of key involvement in high level federal government liaison, preparation of environmental assessment reports, meetings and presentations with a wide range of local and state government representatives and direct dealings with a number of opposing conservation groups.

At all times, CQG has remained dedicated to our needs and has constantly been on the front foot in anticipating potential issues which we should be focused on. They demonstrated an excellent ability to work with key government agencies and were extremely good at building genuine positive relationships with these agencies. They understand the key issues and political drivers and are able to effectively deal with them.

We are very happy to provide this positive reference for Patrice and the rest of the team at CQG.

Yours Sincerely,
TOWER HOLDINGS PTY LTD

Anthony Aiossa
Development Manager
