

# Contaminated Land

Our team has suitably qualified persons (SQPs) under the *Environmental Protection Act (EP Act) 1994* (Qld) for contaminated land investigations

We have conducted numerous land contamination investigations for a range of activities and successfully applied for removal of sites from the EMR

Adoption of innovative ways to reduce time and costs e.g. use of drones (UAV) for surveys and capturing spatial data, as well as non-invasive ground-penetrating radars

Experienced in working with contaminated land auditors and Department of Environment and Science

Preparation of Contaminated Land Investigation Documents (CLID) and notifications for inclusion on EMR

Development of practical, Site Management Plans (SMP)

Contaminated site investigations and remediation projects typically follow these steps:

**Stage 1:**  
**Preliminary Investigation**

**Stage 2:**  
**Detailed Site Investigation**

**Stage 3:**  
**Remediation**

**Stage 4:**  
**Validation**

Qualified and experienced land contamination specialists (SQPs)
