

Environmental Management

CQG's team has significant experience in developing Environmental Management Plans (EMPs) and Environmental Management Systems (EMS) that are practical and tailored.

Our environmental auditors and system specialists have the technical skills and hands-on experience in developing and implementing EMPs and EMS in a range of sectors, including construction, quarrying, linear infrastructure projects, Defence projects, heavy industry, mining, power generation and local government.

CQG's team can assist with:

- High level advice to management teams and boards
- Environmental management systems (EMS)
- Integrated management systems
- Environmental management plans (EMP)
- Environmental compliance auditing
- Environmental risk management
- Environmental awareness and compliance training
- Assessing opportunities to improve performance
