TO WHOM IT MAY CONCERN

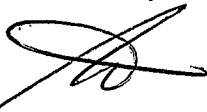

We are pleased to provide a testimonial for CQ Consulting Group (CQG). Patrice and her team have been assisting the Traditional Owner groups in the Cape York region with the planning and environmental approval applications for a proposed underground coking coal mine in the region.

CQG has prepared all our documentation for submission to the State and Federal government and has facilitated a number of meetings with government regulators. CQG is working closely with our people to develop innovatively designed conveyors to transfer the coal to the coast and the use of low draught barges to transport the coal to export vessels in a nearby shipping channel.

CQG have exercised professionalism, dedication, flexibility and a willingness to undertake comprehensive investigations with our people to develop a proposal which we will all be proud of.

We look forward to a long term working relationship with CQG to realise the dream of our old folk and provide a way for our people to come back to their homelands. CQG understands our desires to protect our land whilst embracing sustainable development to ensure our people have a future in Cape York.

Yours sincerely

Waubin R Aken
